Our fully compliant engineers will carry out all the work. With Renewable energy what's to come is looking brilliant. Looking to upgrade your energy systems?

Who are Manx solar electrical?

Manx Solar Electrical are the Isle of Man's exclusive Stiebel Eltron service partners. We are also a Mitsubishi ASHP service partner and Dimplex approved and accredited installers. Our engineers install high performance JA Solar /REC and Sun Power solar modules together with SolarEdge optimisers and inverters.

How will the Isle of Man generate electricity?

Plans to generate about 75% of the Isle of Man's electricity through solar and on-shore wind projects have been backed by the Council of Ministers. Manx Utilities (MU) will look to install solar panels on public car parks and government buildings. Wind turbines could also be built on public land to create 30MW of electricity by 2026.

How many solar sites will Manx Utilities have?

Working with the Department of Infrastructure, Manx Utilities has identified over 30 sites suitable to deliver a total of 30 Megawatts of solar power on the public estate. The first phase of solar installations will see five projects being progressed with more sites to be identified to reach the 10 Megawatt objective.

How much electricity does the Isle of Man need?

While average electricity demand on the Isle of Man stands at 40MW, it can peak at 75MW during the winter and drop at night during summer to 25MW. MU chairman Tim Johnston said "detailed work" to determine the best approach to increase renewable energy was underway.

Will Manx make 75% of energy generation Greener by 2026?

Ministers back Manx Utilities' plans to make 75% of the island's energy generation greener by 2026.
