Solarmanpv com Malta

What is Solarman smart cloud platform?

SOLARMAN has developed a complete intelligent PV solution including hardware,software and data analysis to offer smart energy for global customers.SOLARMAN smart cloud platform has been a global leading PV monitoring and management platform,focuses on managing distributed PV power plants worldwide.

What services does Solarman provide?

Experienced technical engineers will provide online instant Q&A and remote trouble shooting services for global customers. SOLARMAN will provide field services for product installation and commissioning. Notice: Extra fees will be charged for field service overseas.

What products does Solarman offer?

offers a complete solar monitoring &management hardware products include various data logger,smart meter,weather station,optimizer,rapid shutdownand so on. SOLARMAN brings comfortable and eco-friendly life to global users. SOLARMAN has established a close cooperation relation with ZCS in Italy,CORAB in Poland.

Does Solarman provide a field service?

SOLARMAN will provide field servicesfor product installation and commissioning. Notice: Extra fees will be charged for field service overseas. IGEN Tech will provide product training for our partners and end-users,including product installation,system application (software and hardware),Q&A,and others subjected to specific requirement.

Does solarman3rd-home work without JavaScript enabled?

We're sorry but solarman3rd-home doesn't workproperly without JavaScript enabled. Please enable it to continue.

Device Manufacturers For device manufacturers, use SOLARMAN data logger and cloud platform for smart energy management and remote problem solving, we help you to take care of your devices in a more efficient and smart way. ...

Household Owners Check home plant real-time data at anytime and anywhere. Home Energy Management Wisely managing energy use has been a high priority when households are on the way to pursue a smart life with sustainable energy, improved efficiency and reduced bills. By applying advanced technologies of IoTs (Internet of Things) and wireless communication and [...]

on your use, region, and age. The developer provided this ...

Watch Video About Us IGEN Tech Co., Ltd., founded in 2009, a high-tech enterprise, is professional in innovative applications based on technologies of IoTs, cloud computing and big data. In 2016, IGEN Tech obtained round A financing from Sequoia Capital, and in 2022, it obtained a new round of additional strategic investment. Being focus on [...]

O& M routine works, including data sorting, checking, comparing and analyzing will be replaced by AI robots, who will generate an evaluate report about plant health status, highlighting critical issues and advising a problem-solving method.

Solar panels, also known as photovoltaic (PV) cells, are becoming increasingly popular for generating clean and green electricity. To maximize the efficiency and productivity of solar installations, the use of solar ...

Data logger is a professional device that can automatically collect, store and transmit various types of data. It is like a careful and rigorous "data doctor", silently recording key parameters in every corner of industrial ...

PV monitoring refers to the real-time data collection and analysis of photovoltaic power generation systems through various technical means to ensure the optimal performance of the system and timely detect potential problems. These technologies usually include sensors, data loggers, communication equipment, and data analysis software. Application of PV ...

Generally, power consumption data is monitored by devices such as inverters or meters on load side. If the device in PV plant doesn"t have consumption metering function, then users will not be able to check the power consumption data and the plant consumption data on SOLARMAN cloud platform will be displayed as "-".

SOLARMAN recently launched a new product model- data logger (LSE-4W), it is designed to elevate your solar monitoring experience. The data logger (LSE-4W) is equipped with two networking methods: WiFi & Ethernet, which can easily cope with the complex and changeable network environment on site and meet the data collection requirements under ...

SOLARMAN weather station is specifically designed for PV system. It provides a comprehensive environmental monitoring solution for users including irradiance, ambient temperature and humidity, wind direction and speed, and module temperature.

The main function of SOLARMAN Smart Meter is to record and track the electricity generated by solar system. This data is not only used to monitor power generation, but also helps users understand their electricity usage ...
