What does Orca do?

Orca aims to have a positive impact on its country of operations, its people and the population whom we operate alongside, while reliably supplying natural gas to support Tanzania's power and industrial growth in a bid to help the nation transition towards a lower carbon economy.

Why is Orca a sustainable company?

The Company aims to create long-term sustainable and accretive value for our stakeholders, while minimizing its impact on the environment. Orca is focused on maintaining safe and reliable operations at the Songo Songo gas field, offshore Tanzania.

What is Orca doing now?

In the long term, subject to 3D seismic results and contractual conditions, Orca aims to increase its sales volumes and expand its industrial gas distribution to displace higher carbon based and more expensive energy alternatives. Today, Orca is focused on sustaining current demand to support critical power generation and industrial demand.

Is biomass a source of electricity in Somalia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Somalia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What makes Orca a good company?

Orca seeks to bring positive change to the local communities where it operates, and also looks to empower its local workforce. Ensuring a high level of governance and oversight is one of the top priorities for the Company.

What makes Orca unique?

Orca aims to be transparent and generate value for all stakeholders, with investor engagement being a priority for the business.
