Did Technip energies sign a memorandum of understanding with Young Chang?

Technip Energies signed a Memorandum of Understanding (MoU) with the yard infrastructure provider Young Chang and heavy lifting solutions provider Sarens to collaborate on floating offshore wind projects offshore South Korea. The cooperation...

Who is Technip energies?

Technip Energies is a leading Engineering & Technology company for the energy transition, with leadership positions in Liquefied Natural Gas (LNG), hydrogen and ethylene as well as growing market positions in blue and green hydrogen, sustainable chemistry and CO<sub>2</sub> management.

What is Technip energies ino15 based on?

The work, which will be based on Technip Energies INO15 concept "in alignment" with Equinor's Wind Semi semisubmersible design, marks a significant milestone for the 800MW project planned slated to be online by 2027 off the coast of Ulsan.

What floater technology does Technip energies use?

The design of the floating foundation will include Technip Energies' in-house floater technology INO15(TM). With a capacity of 15 megawatts, INO15(TM) technology is a three columns semi-submersible floater which is well suited for large series production.

Will South Korea become a major Asian market for wind at sea?

Despite slow-rolling progress up to now in fulfilling its potential - the nation has barely 100MW in operation or construction offshore - South Korea is widely tipped to emerge as a major Asian market for wind at sea in the second part of the 2020s, with a government target for 12GW in place by 2030.

Should South Korea invest in floating technology?

Floating technology is seen as a particularly attractive prospect for the South Korean market, given the better wind conditions in deeper waters further from shore and the lower level of potential conflict with other sea users.

Together with offshore contractor Subsea 7 SA (OSL:SUBC) and South Korean shipbuilding and offshore industry company SamKang M& T Co Ltd (KOSDAQ:100090), Technip Energies has been selected for the job by the project developers, Corio Generation, a portfolio company of Macquarie Group's Green Investment Group (GIG), and French energy ...

Engineering and technology company Technip Energies has entered a memorandum of understanding (MoU) with yard infrastructure provider Youngchang and Sarens, a heavy lifting solutions provider, to partner on ...
