Is Saint Vincent and the Grenadines dependent on fossil fuels?

**ST. VINCENT AND THE GRENADINES ON A PATH OF RENEWABLE ENERGY DEVELOPMENT**  
Caribbean small island states such as Saint Vincent and the Grenadines (SVG) is almost entirely dependent on fossil fuel for electricity production. This dependency has created major concerns for the sustainability of our economies and environment.

How much does electricity cost in St Vincent & the Grenadines?

This profile provides a snapshot of the energy landscape of St Vincent and the Grenadines--islands between the Caribbean Sea and North Atlantic Ocean, north of Trinidad and Tobago. St Vincent's utility residential rates start at \$0.26 per kilowatt-hour (kWh), which is below the Caribbean regional average of \$0.33/kWh.

What is the national energy policy of St Vincent and the Grenadines?

Established in 2009, the National Energy Policy (NEP) of St. Vincent and the Grenadines provides a plan for the energy sector in the country that addresses sustainability issues. This document was followed in 2010 by the National Energy Action Plan (NEAP), which consolidated policies into actionable steps.

What is the energy tariff in St Vincent & the Grenadines?

Residential, commercial, and industrial customer tariffs are on an inverted block rate starting at \$0.26/kWh. Established in 2009, the National Energy Policy (NEP) of St. Vincent and the Grenadines provides a plan for the energy sector in the country that addresses sustainability issues.

What is the voltage and frequency in Saint Vincent and the Grenadines?

The standard voltage in Saint Vincent and the Grenadines is 110/230 V, and the standard frequency is 50/60 Hz. Every traveler should come along with a voltage converter as, unlike most countries, Saint Vincent and the Grenadines make use of two standard voltages.

The winter in Saint Vincent and the Grenadines experiences gradually decreasing cloud cover, with the percentage of time that the sky is overcast or mostly cloudy decreasing from 58% to 51%. The lowest chance of overcast or mostly cloudy conditions is 46% on January 14. The clearest day of the winter is January 14, with clear, mostly clear, or partly cloudy conditions ...

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on Monday 25th March 2019 has been hailed as a significant milestone in the energy sector of Saint Vincent and the Grenadines.

The Microgrid Project is part of St. Vincent and the Grenadines' shift toward increasing the utilization of renewable energy technologies. Currently VINLEC utilizes hydro and solar energy to provide just under 20% of electricity production on the main island of Saint Vincent. This Microgrid Project will make Mayreau the
