

Munich, August 9, 2023 - STABL Energy GmbH, a green tech start-up from Munich, has successfully completed its financing round of 15 million euros. Within the DACH region, the start-up thus receives one of the largest growth financing rounds in 2023 to date.. Two new investors believe in the start-up's potential to make a significant contribution to the energy transition with ...

GERMANY, June 12, 2023 -- ACCURE Battery Intelligence, an Aachen-based provider of battery analytics software, and STABL Energy, a Munich-based tech start-up that gives electric vehicle batteries a new life, today announced a partnership to strengthen battery innovation and sustainability throughout the entire battery lifecycle. As storage applications expand and ...

STABL Energy wins ees AWARD 2022. On May 10, on the eve of the first The Smarter E in full swing since the Corona pandemic, the industry awards The Smarter E ... Awarded once a year, it honours powerful innovations in the battery and energy storage field, from components to technology applications and business models. Evaluation criteria for ...

STABL Energy supports your company in facilitating and continuously optimizing individual grid charges in order to achieve tailored savings. Atypical grid usage: the key role of battery storage systems. STABL offers intelligent control systems that enable your company to minimize draw from the grid during peak load periods.

STABL develops and commercialises industrial battery storage systems that are stable, reliable and efficient. With its patented innovation based on modular multilevel converter technology, the company contributes, among others, to optimising energy management for renewable energy sources. With its battery storage systems, STABL extends the ...

AI will play an increasingly important role in optimizing battery usage. Advanced predictive models can forecast energy demand and optimize battery charge and discharge cycles to extend battery life and increase efficiency. AI and predictive models can ...

STABL Energy redesigns battery systems to be more efficient, dynamic, and safe. Its novel battery power control system replaces the central inverter in the battery, which improves the efficiency and safety of the system.

Munich, August 9, 2023 - STABL Energy GmbH, a GreenTech startup from Munich, has successfully closed a financing round of EUR 15 million. With this, the startup receives one of the highest growth financing amounts within the DACH region in 2023. ... reliable and resource efficient battery storage enabling faster adoption and transformation ...

The company, based in Germany, deploys energy storage systems from used EV batteries. Image: Stabl. Second life energy storage firm Stabl has raised EUR15 million (US\$16.3 million), while its CEO told Energy-Storage.news the second life market will "struggle with the deteriorating performance of their systems in the coming years".. The company received the ...

The company's engages in manufacturing central inverters that can be connected to the power grid to reduce the self-consumption of battery storage to a previously unachievable level, enabling clients to avoid life-threatening high battery voltage, utilize the full battery capacity, and maximize energy efficiency.

Our goal is to increase the use of renewable energies with the help of energy storage. We do this by setting a new standard for battery storage. With our easily integrated technology, we ...

ACCURE and STABL Energy Announce Strategic Partnership to Drive More Sustainable Battery Storage. ACCURE Battery Intelligence, an Aachen-based provider of battery analytics software, and STABL Energy, a Munich-based tech start-up that gives electric vehicle batteries a new life, announced a partnership to strengthen battery innovation and ...

STABL Energy is a supplier of storage integrators and develops software-based power converters for commercial and utility-scale battery storage systems. The goal is to offset losses, reduce operating costs and make battery storage systems more accessible and affordable.

The new partnerships are an important milestone for Stabl to drive the energy transition through our battery storage," says Dr. Nam Truong, co-CEO and co-founder of Stabl Energy. "For us, Stabl Energy is one of the most promising green tech companies in the European storage market," says Rasmus Lund, Senior Partner at Nordic Alpha Partners.

Stabl Energy: Ein Gamechanger f&#252;r die Energiewende. 70% weniger Energieverlust und 40% geringere Betriebskosten: Das M&#252;nchner Start-up STABL Energy GmbH (Stabl Energy) macht Speichersysteme effizient und lukrativ. Die dynamische Speichertechnologie erm&#246;glicht das Wiederverwenden von Batterien aus E-Autos.

STABL Energy GmbH, a pioneer in the field of scalable industrial battery storage systems based in Munich, announces its cooperation with NOVUM engineering GmbH. The Dresden-based company, which specializes in battery diagnostics, collaborates with STABL Energy as a test partner to ensure the highest quality and safety of industrial energy storage ...

Therefore, it is crucial to design air-stable battery materials, which can be accomplished by constructing well-designed protective layers. In this manuscript, we provided a comprehensive review of research progress in improving the air stability of battery materials, and the protective mechanisms involved by focusing on the Li metal anodes ...

The STABL technology can easily handle the sometimes very different residual capacities of the battery modules from the vehicle, allowing the batteries to be used for longer. STABL Energy's first product - the SI100 - connects the ...

Munich, 27 April 2023 -- STABL Energy GmbH uses MOSFETs from Infineon Technologies AG (FSE: IFX / OTCQX: IFNNY) to make stationary energy storage systems from retired electric passenger car batteries. ... contributing to the success of the energy transition. To do this, the company is setting a new standard in battery storage design, safety ...

The KI-M-Bat research project focuses on the development of a modular and highly efficient hardware and controller concept for current and future relevant grid applications using new and used ("second-life") battery storage systems, ...

STABL has found a solution for this: The innovative STABL technology can integrate batteries with different remaining capacities. Solution "Second-life" refers to the reuse of batteries that no longer have enough power for use in an e-vehicle, but can still store enough energy to be used in other applications.

The development of air-stable battery materials has been inspired by lotus leaves. To create hydrophobic surfaces, coating materials with a low surface energy are needed. Many fluorine-containing materials, including inorganic and organic materials, have been designed, synthesized, and wrapped around battery materials to act as protective layers ...

The aim of Total's tests was to validate the exceptionally high efficiency of STABL's energy storage technology. It is particularly remarkable that these values were achieved even when using heavily aged battery modules. The tests with modules that only have low and varying useful capacities after a few years of operation put our technology ...

Munich-based start-up STABL Energy successfully secures a EUR15 million funding round led by Nordic Alpha Partners and the European Innovation Council to advance its used car battery technology for efficient ...

Market observation now shows that Germany and the UK lead the rankings in the storage sector. The coal and nuclear phase-out and the German government's plans to increase the proportion of green electricity generation from wind and solar energy by 40 percentage points also make it necessary to expand storage technologies.

German green tech startup Stabl Energy GmbH said on Wednesday it has raised EUR 15 million (USD 16.45m) in a financing round to support its commercial expansion and the further development of its battery ...

STABL Energy | 6.364 Follower:innen auf LinkedIn. Commercial Battery Storage Systems | STABL Energy strebt mit seiner Technologie eine nachhaltige Energienutzung an. Unser Ziel ist es, den Einsatz von

Energiespeichern f&#252;r erneuerbare Energien zu erh&#246;hen, indem wir einen neuen Standard f&#252;r Batteriespeicher setzen. Mit unserer einfach zu integrierenden ...

Battery Storage System Installation: Installation services for battery storage systems at chosen locations, optimizing for used car batteries to save CO2 emissions. Inverter Technology: Technology replacing conventional inverters ...

Munich, August 9, 2023 - STABL Energy GmbH, a GreenTech startup from Munich, has successfully closed a financing round of EUR 15 million. With this, the startup receives one of the ...

Technical University of Munich spin-out, STABL Energy has been working on a different way to convert the voltage to AC. The company's "modular multilevel inverter" approach is already widely used in high-voltage DC transmission. STABL has taken the technique and optimised it for stationary battery storage systems.
