

Will Sudan's First Solar Park be built in the UAE?

According to the country's Ministry of Energy, an unspecified UAE solar company has committed to building several large scale PV plants across the country. These new projects would be granted a 20-year PPA and would be Sudan's first solar parks. Few specific were outlined in the statement.

Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Will Sudan buy electricity from UAE based companies?

In an official statement, the Sudanese government said it will buy the generated electricity at a competitive price over a period of 20 years from facilities that will be built by unspecified UAE-based companies. No more details on the projects' number and locations were disclosed.

How much solar power does Sudan have?

Most of Sudan's electricity generation comes from around 3.2 GW of hydropower. According to the latest statistics from the International Renewable Energy Agency, Sudan had only 19 MW of installed solar power at the end of 2019. The Sudanese government is aiming to install 500 MW of solar and 300 MW of wind by the end of the year.

Will Sudan be able to deploy solar power in Africa?

If implemented, these projects would represent the country's first attempt to deploy utility scale PV capacity. Sudan has one of the lowest levels of solar development in Africa although it has one of the best levels of solar radiation in the whole continent.
