

Why should you choose a Volvo Penta Bess subsystem?

Volvo Penta's BESS subsystems provide you with an energy-dense solution with an advantageous C-rate. This helps ensure efficient energy storage with rapid charge and discharge capabilities, which is ideal for applications where energy reliability and swift power delivery are crucial.

Why is Volvo launching a Bess solution?

The company said the launch of a BESS solution is a strategic move to supplement its power generation business and tap into a new segment. A spokesperson for Volvo Group told Energy-Storage.news that the product is a sub-system rather than a full containerised solution.

What is a Bess subsystem?

Volvo Penta's energy-dense BESS subsystems are purpose-built to enable OEMs to build transportable, high-performance BESS solutions supporting the energy transition in industries where energy density is essential. Click on a number or headline to learn more. The Volvo Group is at the forefront of battery development.

Why should you buy a Volvo Penta Bess?

The Volvo Penta BESS offer demonstrates high-power output from an energy-dense and small footprint. With its origins in heavy-duty design, and being optimized for tough environmental conditions, the battery system is an excellent option for BESS applications.

Who is Volvo energy?

Volvo Energy, the latest addition to the Volvo Group, brings a fresh perspective while leaning on decades of experience. Discover our story and the unique position we hold within the group. About us Step into tomorrow with us.

Volvo Construction Equipment and Portable Electric unveil game-changing PU130 mobile battery energy storage system with first-of-its-kind 48-volt DC Fast Charging capability Las Vegas, May 21, 2024 - In a landmark collaboration aimed at revolutionizing the construction industry's approach to off-grid electric equipment charging, Volvo Construction Equipment (Volvo CE) ...

• An L25 Electric wheel loader from Volvo Construction Equipment (Volvo CE) and a Power Unit, PU500, a Battery Energy Storage System with an integrated charger, from Volvo Energy are being used alongside other electric solutions at Hammarbybacken ski resort in Stockholm. • The project is designed to showcase the possibility for fossil-free ski resorts and ...

Battery energy storage systems (BESS) can enhance grid reliability, capacity and resilience through energy storage and delivery. Volvo Penta's energy-dense BESS subsystems are purpose-built to enable OEMs to

build transportable, high-performance BESS solutions supporting the energy transition in industries where energy density is essential.

Volvo Penta BESS subsystem . IMAGE SOURCE: Volvo Penta . 2 February 2024, 13:24. by Volvo Penta (Europe) Volvo Penta acquires a minority stake in UtilityInnovation Group (UIG) to advance Battery Energy Storage Systems (BESS). UIG's recent acquisition of Enicity enhances the partnership's ability to contribute to a resilient energy future. ...

What is BESS? A BESS works like a large-scale rechargeable battery, storing electricity when it's abundant, often from renewable sources like the sun and wind. In addition to supplying energy for your business when demand is high, ...

The project is relatively large within the second life BESS space, where most projects and companies are still deploying in the hundreds of kWh rather than MWh-plus. Volkswagen recently deployed its first major second life BESS project totalling 560kWh, for example, which the company's EV infrastructure arm Elli discussed with Energy-Storage ...

As Business Manager Group BESS, you will have a central role to develop and execute Volvo Energys" internal BESS sales roadmap. You will lead the deployment of BESS solutions in Volvo Group sites creating the total offer and securing project execution in close collaboration with the sites and Sales Engineering among others.

Opportunities for EV charging infrastructure and BESS The potential for BESS to revolutionize energy storage presents a promising path for a consistent energy supply. When considered together with charging infrastructure, the opportunities for faster and more reliable charging of electric vehicles become clear.

The role involves liaising with colleagues in the Volvo Energy team in Europe and India. You will be an important contact point on BESS for our North America partners and suppliers. Design and Implementation: Develop and review BESS configurations, ensuring compliance with safety standards and operational requirements.

With its origins in heavy-duty design, and being optimized for tough environmental conditions, the battery system is an excellent option for BESS applications. "Volvo Penta"s engineering expertise, together with ...

The power solutions arm of manufacturing firm Volvo Group has expanded into the battery energy storage system (BESS) market, launching a sub-system product initially in the US and Europe. The company said the ...

Volvo Penta is part of the Volvo Group, specializing in providing leading technology and engine solutions to the marine industry and serving the needs of marine transportation. Currently, Volvo Penta has researched and developed an environmentally friendly product line, also known as a green energy source, the Volvo BESS

Volvo Bussar vill främja hög livskvalitet med hjälp av hållbara kollektivtrafiklösningar. Därför är respekten för mänskliga rätigheter mycket viktig för oss. Detta gäller inte bara i relation till vår egen verksamhet utan också i fråga om vår leveranskedja och våra affärspartner. Volvo Bussar har, genom Volvokoncernen, varit ...

Volvo Energy. At Volvo Energy, we aim to accelerate and ease the shift to electrification. We will offer a Battery Energy Storage System (BESS) that provides a reliable supply of renewable energy and reduces costs. We also work on robust on-site and en-route charging solutions to ensure consistent, dependable energy access.

In a strategic move to supplement its power generation business and tap into new segments, Volvo Penta is launching a new offer - a high-performance subsystem based on the Volvo Group's electromobility platform, optimized for OEMs' BESS applications. "Battery energy storage is increasingly in demand for a variety of applications including utilities, ...

Volvo Penta is advancing its net-zero initiatives by providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support. ... The company is focused on growing its role as a subsystem supplier, working with BESS manufacturers to enhance knowledge, develop advanced solutions, and support ...

Just days after announcing its strategic entry into the battery energy storage (BESS) sector jointly with OEMs, Volvo Penta as a BESS subsystem supplier has unveiled a partnership with Utility Innovation Group (UIG) aimed at US and international markets. The two companies are collaborating to enhance power grid reliability
