In November, the UK hosts the delayed United Nations COP26 climate change summit. During the build-up, and over the COP itself, the Sussex Energy Group will be presenting highlights of SPRU research in the SEG@COP26 seminar series that are relevant to the themes of these crucial global negotiations. The series encompasses the breadth of sustainability ...

Sussex Energy Group. How to reduce energy use for a successful transition to net-zero. Research from the Sussex Energy Group (SEG) is tackling key questions about how to reduce society's demand for, and use of, energy. Using less energy is not only important to households concerned about rapidly rising bills. It's also vital for a fair ...

The Sussex Energy Group's Dr Abigail Martin, said: "We bring a strong emphasis on the value of bringing together different stakeholders - and especially giving voice to host communities and workers - in key locations where public and private investment is targeting technological change.

Dr Matthew Lockwood has been announced as the new co-director of the Sussex Energy Group (SEG) replacing Professor Benjamin Sovacool who steps down after five years in the post. Dr Lockwood, a political ...

She was Co-Director of the Sussex Energy Group from April 2017 until August 2021, and inaugural Course Director of SPRU's online MSc in Energy Policy in 2018/19. During his "State of the Nation address" last week South Africa's President Jacob Zuma promised to do "everything we can" to resolve the country's energy challenge, including: to develop a large nuclear fleet; construct yet more coal-fired power plants; import...[Read more >](#)

The beauty of a heat pump is that they can have efficiencies of up to 300%, i.e. one unit of electrical energy can deliver three units of heat energy. Norway is a country that has championed the installation of heat pumps and indeed the greatest penetration of heat pumps in Europe is in Scandinavian countries.

In late 2020, there was a flurry of announcements about climate change and energy - first a ten-point plan for a "Green Industrial Revolution"[i] followed a few weeks later by a much-delayed energy White Paper[ii]. Nuclear power figures prominently in both narratives, with...[Read more >](#)

The UK Research and Innovation (UKRI) has announced £15 million of funding for the next phase of energy demand research in the UK.
