

Who is Svevind Energy Group?

SVEVIND Energy Group announces today that it has completed a transaction with the leading Norwegian utility Statkraft. Our Swedish subsidiary SVEVIND Nordic AB, the successor to SVEVIND AB, is now officially part of Statkraft. The... The first week of October 2022 marked an important milestone in the history of Svevind's "Project Sandbacka".

How does Svevind AB manage a wind farm?

Svevind AB establishes a subsidiary for the project, which is then responsible for project planning. Construction and ownership may also be through Svevind AB's subsidiaries. Once the wind farm has been approved, Svevind AB or the relevant subsidiary may sell all or part of the project, or retain it for its own construction and operation.

How does Svevind design a wind farm?

Svevind identifies suitable locations with regard to favourable wind conditions, grid connection capacities, the absence of conflicting interests and rural development opportunities. The design of the wind farm is then planned and the documentation produced for the permit application.

The SVEVIND Energy Group is a privately owned group of companies based in Dresden, Germany. Founded and established by entrepreneur Wolfgang Kropp is specialized on planning and developing large-scale renewable energy projects. With offices in Aqtau, Almaty and Astana (Kazakhstan) the German company is driving the energy transition forward with its own vision.

SVEVIND Energy Group: SVEVIND Energy Group, with headquarters in Dresden, Germany, is a European project developer with over 30 years of experience in the renewable energy sector. Their significant project, the MARKBYGDEN 1101 wind farm in northern Sweden, is set to be one of Europe's largest onshore wind farms with a capacity of 3.4 GW.

2023 - A Review. von SV_Admin | Dez 31, 2023 | News Hyrasia one, News MB1101. There are years in the history of a company that, in retrospect, are described as groundbreaking, as shaping the future. 2023 was exactly that for SVEVIND Energy Group - a year that will go down in the annals of company history.

Hyrasia One, Svevind Energy's Kazakhstan-based renewable hydrogen and ammonia mega-project, has entered the pre-FEED phase. Located on the Kazakh Steppe in the Mangystau region, at full capacity the project is expected to produce 2 million tonnes of renewable hydrogen per year (or 11 million tonnes per year ammonia equivalent).. Set to conclude at the end of this ...

The first week of October 2022 marked an important milestone in the history of Svevind's "Project Sandbacka". The 90+ megawatt (MW) ready-to-build wind farm has been sold to Prime Green Energy
