

Agam's technology enables air circulation with closed thermal screens & without roof ventilation, providing optimal and uniform humidity & temperature conditions, whilst dramatically reducing energy consumption and CO2 emission. Agam's systems use special hygroscopic brine that enables the conversion of humid air into dry air, reducing humidity ...

Founded in 2009 by industry veterans, Agam develops and produces innovative, energy-conserving and environmentally friendly cooling, heating and dehumidification systems. Agam's solutions serve the needs of both the industrial and the agricultural sectors, including greenhouses, indoor cultivation and seed and grain warehouses.

Agam's technology enables air circulation with closed thermal screens & without roof ventilation, providing optimal and uniform humidity & temperature conditions, whilst dramatically reducing energy consumption and CO2 emission. Agam's ...

Climate, dehumidification & air purifying control system Agam's dehumidifiers circulate the indoor air through special hygroscopic brine. The hygroscopic material extracts the humidity from the air and in addition captures a vast of air-borne pathogens such as Fungi spores. The AGAM units have two modes that enables to either reduce or increase the air temperature [...]

screens. 2. The greenhouse that was equipped with a thermal screen only (GH 2) was constructed of impermeable, reflective sheeting that provided 50% shade. 3. A greenhouse equipped with a thermal screen and the Agam system (GH 3). The Agam system is based on a heat converter that can lower the RH in the greenhouse and supply the additional energy

Founded in 2009 by industry veterans, Agam develops and produces innovative, energy-conserving and environmentally friendly cooling, heating and dehumidification systems. Agam's solutions serve the needs of both the industrial and the agricultural sectors, including greenhouses, indoor cultivation and seed and grain warehouses.

Agam??????????,?????????? ??????????? ???????????,?????,??????????

Founded in 2009 by industry veterans, Agam develops and produces innovative, energy-conserving and environmentally friendly cooling, heating and dehumidification systems. Agam's solutions serve the needs of both the ...

The system receives its energy supply out of the electricity system, as well as the heating system located in the greenhouse. Heating system must supply hot water at a temperature of 850 C, at capacity of 5 M3/h and at a

Syria agam greenhouse energy systems

pressure of 10 M head of water. Electrical current of 20A.

Energy-conserving and environmentally friendly Leave your details and we will contact you. HOME; TECHNOLOGY; ABOUT; RESEARCH; FAQ; GALLERY; Articles; CONTACT; Distribution +972-52-220-5033, +972-50-220-7622. sales@agam-energy . Mailing address: 16 Arlozorov St. Hod HaSharon 4520316, Israel.

Agam Energy Systems Ltd is active in the area of energy conservation and environmental technologies. Based on more than 10 years know-how and experience in the field of heat exchange between air and hygroscopic brine, the company develops, manufactures and markets new and more efficient technologies and machines (all patented). The current products are ...

AGAM Energy Systems Ltd. designs, develops and manufactures air conditioning and dehumidification systems. ... Greenhouse effects caused by these gases warm our planet thus endangering the existence of its inhabitants. Our goal is to reduce fuel consumption by introducing new and more efficient technologies and machines.

Agam Greenhouse Energy Systems Ltd. ~2~ Agam Greenhouse Energy Systems Ltd. 16 Arlozorov St. Hod Hasharon 45203, Israel Tel: 972-8-9403050 Fax: 972-8-9403232 Cell: 972-52-2205033 E-mail: agammm@netvision .il Web: Background Arava valley is the largest export oriented center for winter growing crops with 1400 Hectare

CEO assistant, Marketing at Agam Greenhouse Energy Systems Ltd. · Experience: Agam Greenhouse Energy Systems Ltd. · Location: Petah Tikva · 201 connections on LinkedIn. View Neta Rimon-Palevsky's profile on LinkedIn, a professional community of 1 billion members.

Agam Greenhouse Energy Systems | 61 ?? ?????????? ??? LinkedIn. dehumidification and filtration of airborne spores in greenhouses + dramatically reducing energy costs and CO₂ emission | Our technology enables air circulation with closed thermal screens or without window ventilation, providing optimal and uniform humidity and temperature conditions, whilst dramatically ...

Greenhouse Energy. Agam's Eco Climate Converter (ECC) is a unique, patented greenhouse dehumidification system. It is also known as a ventilated latent heat converter, designed to take excess humidity and convert it into heat and water by blowing air through a special hygroscopic brine in a compact cooling tower.

dealer for AGAM Energy Systems As of June 1, 2015, Horticoop Technical Services is the exclusive dealer for AGAM Energy Systems" products in the Netherlands and neighboring German state Lander (Lower

Syria agam greenhouse energy systems

Saxony and North Rhine-Westphalia). AGAM Energy Systems, headquartered in Hod-HaSharon, Israel, develops and

AGAM Greenhouse Energy Systems is proud to have our machines marketed to many agricultural growers around the world, and distributed by a network of hard-working... 2021 energy crisis - AGAM Greenhouse Energy Systems (published on HortiDaily)

AGAM Greenhouse Energy Systems developed their Ventilated Latent Heat Converter and Hybrid Air Conditioner system, offering a unique solution that might prove particularly handy in these times. "The systems employ a hygroscopic brine to dehumidify air in the growing facility while harnessing wasted thermal energy, giving the user a much higher ...

Agam Greenhouse Energy Systems develops micro-climate energy-conserving, dehumidification, heating, and cooling systems for the agricultural, horticultural, and cannabis industries. The company's Ventilated Latent Heat Converter and Hybrid Air Condition are dehumidification systems for cold and warm climate greenhouses.

For AGAM Greenhouse, press here. AGAM is developing a proprietary Liquid Ring Rotating Casing Steam Turbine (LRRC ST) that can generate electricity from waste heat, starting at 90c hot water or 100c steam, currently thrown ...

Founded in 2009 by industry veterans with a total of over 75 years of expertise, Agam develops and manufactures innovative, energy-conserving and environmentally friendly dehumidification, heating and cooling systems. Agam's solutions serve the needs of horticultural and agricultural industries, including nurseries and recently developed medical cannabis industries in ...
