

Estonian Government set a highly ambitious goal to produce all energy consumed in Estonia using renewable energy sources by 2030. This is a revolutionary decision as the state's previous goal was more modest: to produce 40% of all ...

Energy in Estonia has heavily depended on fossil fuels. [1] Finland and Estonia are two of the last countries in the world still burning peat. [2] [3]Estonia has set a target of 100% of electricity production from renewable sources by 2030 [4] and climate neutrality by 2050. [5]In response to geopolitical tensions, Estonia reduced its reliance on Russian energy sources by halting ...
