

The Netherlands best solar system company

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs.
