Link to the ITU filing, as u/ziptested pointed out, the frequency requested is around 126.5GHz, 161.25GHz and 170.75GHz, it's actually above the W band as defined by IEEE which is 75~110Ghz, I think this should be IEEE G band which is 110~300GHz. A quick search didn't find any paper discussing using such high frequency for satellite to ground communication, so it ...
