

What is Yildirim energy doing in Tonga?

YILDIRIM Energy has ambitious plans to produce new solar power plants and build wind and geothermal power projects across its markets for the next 5 years, while aiming at reaching 3GW energy production capacity by 2030 and becoming the leading electricity producer with a renewable energy portfolio in Tonga.

What is Yeta & Yilsolar?

YETA is YILDIRIM Energy's power and gas trade company. YILDIRIM Energy is the energy production and trade branch of YILDIRIM, focusing on renewable energy in hydro, solar and wind power plants. YILSOLAR is the solar power company of YILDIRIM, constructing a solar panel factory in Kocaeli, Turkey.

How will Tonga move away from fossil fuels?

This project aims to help Tonga move away from fossil fuels and shift to renewables. The project will deliver utility-scale storage systems to provide base load response and grid stability, paving the way for more renewable energy integration in the main island, while green mini-grids will be installed in the outer islands.

How can Tonga transform its energy sector?

The Government of Tonga has formulated targets to transform its energy sector by achieving a 50 percent share of renewables in the country's energy generation mix by 2020 and 70 percent by 2030. However, achieving these targets require catalytic investments to transform the country's energy infrastructure.

How much energy does Tonga generate?

It accounts for 90 percent of its electricity generation. The Government of Tonga has formulated targets to transform its energy sector by achieving a 50 percent share of renewables in the country's energy generation mix by 2020 and 70 percent by 2030.

Is Tonga a climate resilient country?

Shifting electricity production in Tonga to a low-carbon, climate resilient path. Tonga is the second most climate vulnerable country in the world. Like many other Small Island Developing States in the Pacific, Tonga's energy source is almost exclusively imported diesel. It accounts for 90 percent of its electricity generation.

During the ceremony, YILDIRIM Energy unveiled its ambitious solar energy project in Kosovo, which involves installing solar panels with a capacity of 109 MW in the municipality of Drenas. This project is expected to significantly contribute to decarbonizing Kosovo's energy production and improving its energy infrastructure and economy.

YILDIRIM Energy Investments commissioned the Eti Krom Solar Power Plant of 44 MW in 2022, aiming to invest in renewable energy of 1 GW by 2030. The company has also shifted to production from green hydrogen and renewable energy resources to reduce carbon emissions and protect the environment due to the ever-increasing need for energy across the ...
