

Types of commercial solar panels Svalbard and Jan Mayen

Wind and solar work well together in the Arctic, since in the darkest winter months, wind can produce plenty of clean energy. In the summer, solar takes full advantage of the Midnight Sun - 24 hours of daylight. A fourth phase of installing PV at the airport is planned for 2020/2021, when the total installed solar power will be quadrupled.

For optimum performance, clean the solar panels regularly with a damp towel. Do not use any solvent for cleaning, and be careful not to put too much pressure on the solar panels while cleaning. The Imperial III Commercial Solar Post Light includes a 3" fitter to broaden your scope of installation options.

The starting point for this article was the January 2022 release of our UK Solar Commercial Rooftop Opportunities Report. We released this report at the end of 2021, focusing on commercial solar rooftop projects (everything above 100kWp dc) from the start of 2019 (when production-based incentives were phased out completely by the government).
