

Is going green a good business strategy for Türkiye?

In short, the World Bank believes that going green is a good business strategy for Türkiye, and the more decisively Türkiye engages the higher the benefits will be. The World Bank is supporting a green transition in Türkiye to help protect people against the impact of climate change and to invest in a green economy for the future.

What is the Türkiye green industry project?

"The Türkiye Green Industry Project recognizes the vital role of SMEs in Türkiye's economy and their potential to drive sustainable development.

Are there Green Business Building Opportunities in Türkiye?

Building on our scenario-based assessment, there are several green business building opportunities for companies, institutions, and the public sector, selected according to viability, adaptability to Türkiye's infrastructure and workforce, and potential sustainability and economic impact.

Does Türkiye have a sustainable future?

Türkiye's greenhouse gas emissions have increased substantially over the past two decades and the manufacturing sector is a significant contributor to this increase. This project aims to drive the transition of industrial firms towards a low-carbon, sustainable and resilient future, while also promoting economic growth and job creation.

How can nature-based solutions address climate and development challenges in Türkiye?

Protect ecosystems and mainstream nature-based solutions (NBS): NBS can cost-effectively address climate and development challenges with multiple socioeconomic and environmental benefits. Compared to its OECD peers, Türkiye scores low on ecosystem health and biodiversity and its ecosystems are vulnerable to climate extremes.

How does Türkiye's transition to green technology reflect its current advantages?

For example, it reflects Türkiye's current advantages by assuming a rapid transition to green technologies for select areas--such as a full transition to renewables in power generation, and full-scale adoption of electric arc furnace (EAF) technology in cement production.
