

# Uganda solar energy business inia

What is Uganda Solar Energy Association (USEA)?

Uganda Solar Energy Association (USEA) is an independent nonprofit association dedicated to facilitating the growth and development of solar energy business in Uganda and the East African region.

How is solar energy used in Uganda?

The level of solar energy utilization in Uganda is still very low. The use of solar PV began in the early 1980s mainly driven by donor-funded programmes for lighting and vaccine refrigeration in health centers. Later the Uganda Railways Cooperation, a government parastatal, installed 35kW at 29 locations for communications and signaling.

Why is the energy sector important in Uganda?

The energy sector is one of the key sectors of the Ugandan economy. The sector provides a major contribution to the treasury resources from fuel taxes, VAT on electricity, levy on transmission bulk purchases of electricity, license fees and royalties and foreign exchange earnings from power exports.

The International Solar Alliance (ISA) and the Government of Uganda have agreed to formalise a comprehensive Country Partnership Framework (CPF), set to be inked in May 2024 during Uganda's high-level ...

More than 300 small-scale farmers in Uganda are set to receive solar irrigation systems under the Uganda Intergovernmental Fiscal Transfer programme. This is to assist them to adapt to climate change challenges, said Dr Samuel Kaheesi, the Principal Agriculture Officer for the Kikuube District, where the farmers live in Uganda.

Shakti Pumps was awarded India's Most Preferred Solar Energy Brands-2019. National Award for Excellence in Energy Management 2019. The solar power system was designed to deliver efficient consumer electronics technology for the remote, off-grid household customers in Uganda. To make clean energy affordable and accessible to all, Fenix introduced a consumer financing platform "Pay-As-You-Go" (PAYGO) that allowed end-users to make flexible payments over time for the use ...

Solar to underpin Uganda energy plan. The Energy Transition Plan sees solar power as the leading source of low-cost generation. According to the analysis, Uganda has higher quality solar resources across the country than global leaders such as Spain. Have you read? Uganda: Sprawling Kampala market lit up with solar systems

Shakti Pumps (India) Limited, of the critical Indian stainless steel submersible solar pump manufacturers, has now announced the commencement of its operations in Uganda. The company has also opened its office in the country to coordinate its expanding business better. Indian External Affairs Minister S Jaishankar, Ramesh Patidar, Executive Director of ...

More than 300 small-scale farmers in Uganda are set to receive solar irrigation systems under the Uganda Intergovernmental Fiscal Transfer programme. This is to assist them to adapt to climate change challenges, said ...

USEA Uganda Solar Energy Association (USEA) is an independent non-profit association dedicated to facilitating the growth and development of solar energy business in Uganda and East Africa region. USEA was formed in 2016 by private sectors companies that deal in solar energy business with help from private sector foundation, Ministry of Energy ...

USEA is the leading organization for Uganda's solar energy industry, promoting the adoption of solar technologies and striving to expand access to clean, sustainable, and affordable energy across the country.

Our solar PV system design specialists turn your ideas into reality, with first-class energy technology design join the growing number of business owners that have discovered the commercial benefits of solar power, battery energy storage and solar design services. We design a cutting edge solution for your business.

Off-Grid Solar: The time is now. The future of energy is sustainable, equitable, and resilient, and off-grid solar is leading this transformation in Africa and Asia. Off-grid solar delivers clean, reliable power to the most remote and underserved communities where traditional grid infrastructure falls short.
