

Does Uruguay have a green energy grid?

Uruguay's power grid runs on 98% green energy. Here's how it got there : Planet Money : NPR How did Uruguay cut carbon emissions? The answer is blowing in the wind Ramón Méndez Galain was Uruguay's National Director of Energy from 2008 to 2015. His plan for the energy sector led to 98% of Uruguay's grid being powered by green energy.

What is Uruguay's energy future?

His vision for Uruguay's energy future was to cover that empty land with hundreds of wind turbines. Today, wind power accounts for around 40% of Uruguay's energy production. And, according to a 2008 law, all the wind in the country officially belongs to the Uruguayan people.

Will Uruguay become a leading country in the development of E-Fuels?

Due to its highly decarbonized energy sector with strong wind and solar capacity, Uruguay is expected to become a leading country in the region in the development of e-fuels, or synthetic fuels that are produced using renewable energy.

Why does Uruguay generate a surplus of electricity?

Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.

Why did Uruguay reopen the Nuclear Debate?

The energy crisis in Uruguay in 2007 led to Uruguay reopening the nuclear debate under the presidency of Tabaré Vázquez, when the Executive Branch established a multiparty committee devoted to the study of the use of nuclear energy to generate electricity and the installation of a nuclear power plant.
