The solar energy market in Venezuela is poised for growth, driven by increasing energy demand and a shift towards renewable energy sources. Despite challenges such as the impact of COVID-19 on project timelines and the country's current reliance on hydropower and wind, the potential for solar energy remains significant

due to favorable solar ...

To counteract this heavy reliance on hydroelectric power -- an energy source that, despite being renewable, can still have negative environmental and social consequences -- the government began a push for a transition to other kinds of renewable energy in Venezuela roughly two decades ago. In the early 2000s, the government of former ...
