

An innovative design that combines the unique Volvo Penta Inboard Performance System with four Volvo Penta D13 engines has transformed a catamaran in the Gulf of Naples, improving efficiency and heightening the passenger experience. Giove Jet is one of the first passenger-transport catamarans to feature the quadruple D13-IPS 30 set-up.

Recognizing the transformative potential of BESS, Volvo Penta has acquired a minority stake in UtilityInnovation Group (UIG) to enable the development of resilient and reliable BESS solutions. Strengthened recently by UIG's acquisition of Enicity, we are well-prepared to continue our contribution towards a more resilient energy future.

In a strategic move to supplement its power generation business and tap into new segments, Volvo Penta is launching a new offer - a high-performance subsystem based on the Volvo Group's electromobility platform, optimized for OEMs' BESS applications. "Battery energy storage is increasingly in demand for a variety of applications including utilities, ...

Volvo Penta is advancing its net-zero initiatives by providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support. This is exemplified in a recent collaboration with ...

Recognizing the transformative potential of BESS, Volvo Penta has acquired a minority stake in UtilityInnovation Group (UIG) to enable the development of resilient and reliable BESS solutions. Strengthened recently by UIG's ...

Seasoned power generation company and a long-time customer of Volvo Penta, Aiab Energy is diversifying its portfolio into the field of battery energy storage systems (BESS). In this exciting collaboration, Aiab Energy has chosen Volvo Penta to provide an optimized BESS subsystem for their future BESS solutions.

Uma vez conectado, todos os componentes ativos no subsistema BESS da Volvo Penta s#227;o isolados, selados e monitorados pelo HVIL nas caixas de jun#231;#227;o. 7. Interface DC. Adaptada do Grupo Volvo, a interface DC da Volvo Penta #233; calculada para lidar com a capacidade de carga configurada e conectada ao inversor do OEM. Ajudar os OEM's com o ...

Battery energy storage systems (BESS) can enhance grid reliability, capacity and resilience through energy storage and delivery. Volvo Penta's energy-dense BESS subsystems are purpose-built to enable OEMs to build transportable, high-performance BESS solutions supporting the energy transition in industries where energy density is essential.

Volvo Penta PR and Communications Tel: +46(0) 739026626. For more information, please visit [volvopenta](#). Volvo Penta is a global manufacturer of engines and power systems for boats, vessels, and industrial applications, with a century of experience and a global network of nearly 3,500 dealers across 130 countries. The company is recognized ...

Volvo Penta's battery energy storage expertise advances. Volvo Penta is advancing its net-zero initiatives by providing its battery energy storage subsystem to BESS manufacturers venturing into charging infrastructure support, exemplified in a recent collaboration with TecnoGen, part of BGG (Bruno Generators Group).

Volvo Penta and Swedish backup power solutions company Aiab Energy are strengthening their collaboration to provide an integrated battery energy storage solution that meets the specific needs of Aiab Energy's ...

Above: UIG's Energy Storage for Resiliency (ESR) platform with Volvo Penta's BESS subsystem. Building upon the partnership established with Volvo Penta's initial investment in 2023, UtilityInnovation Group (UIG) will scale its expertise to meet the accelerating demand for more dynamic, sustainable electric grid infrastructure. "This follow-on investment in ...

The Volvo Penta BESS offer demonstrates high-power output from an energy-dense and small footprint. With its origins in heavy-duty design, and being optimized for tough environmental conditions, the battery system is an ...

In a strategic move to supplement its power generation business and tap into new segments, Volvo Penta is launching a new offer - a high-performance subsystem based on the Volvo Group's electromobility ...
