

Is Webasto a sustainable Battery Company?

For passenger cars, Webasto develops battery systems according to customer specifications. The automotive supplier is striving to reduce the ecological footprint in the development and production of batteries. On the way to more sustainable battery systems of the future, Webasto is showing initial ideas.

Where are Webasto batteries made?

Made in Schierling for customers all over the world: The Webasto plant in Bavaria is home to one of the most modern production facilities for battery systems - the highly flexible Multi-Product-Line, which can produce up to 40,000 battery systems per year.

What is a Webasto standard battery system?

For example, the Webasto Standard Battery System for commercial vehicles is equipped with a robust casing and efficient thermal management. It is particularly suitable for demanding applications such as on construction sites or off-road.

Why should you choose Webasto CV standard battery system?

The Webasto CV Standard Battery System guarantees top-notch quality and safety. Its modular, scalable design caters to diverse vehicle types, offering robust housing, unwavering quality, and efficient thermal management. With our standard portfolio you can start directly with the electrification and get started even with small quantities.

Why did Webasto invest in e-mobility?

In 2016, Webasto has decided to invest in e-mobility. Since then, the company drives ahead the development and production of individualized as well as standardized battery systems. For example, the Webasto Standard Battery System for commercial vehicles is equipped with a robust casing and efficient thermal management.

How does Webasto develop a vehicle system?

When electrifying vehicles, Webasto develops a vehicle system together with its customers. The Standardized Battery Systems meet the highest requirements for quality, safety and performance. Webasto produces according to the strictest German safety standards and prototype development as well as testing are also carried out in-house.

Unlock the future of energy with Webasto's Standard Battery System. Choose between the VIB and VIG interfaces for seamless scalability. Power your journey! Home. About Us Close Menu About Us Strategy. Strategy Strategy. Webasto strives for safer, climate-friendly mobility and develops innovative vehicle technologies for a fully electric future. ...

The battery system is manufactured at Webasto's Schierling plant in Bavaria. One of the most modern battery

system production facilities is located here - the highly flexible Multi-Product-Line, which can produce up to 40,000 battery systems per annum.

Unlock superior performance with Webasto's CV NextGen Battery. Ideal for diverse on- and off-highway vehicle applications, it boasts high volumetric energy density in a compact design. ... (HVH) is the ideal heating system for battery electric vehicles (BEV) and plug-in hybrids (PHEV). It converts DC electric power into heat with practically no ...

The standardized battery system weighs 654.8 pounds (297 kilograms), can be integrated vertically or horizontally into vehicles, and offers system integrators and vehicle manufacturers maximum freedom during installation. Thanks to its identical dimensions, the high-voltage battery fits seamlessly into all installation spaces that already use ...

Rooftop or integrated system, battery-operated or direct drive - the powerful, efficient transport refrigeration systems from Webasto are very versatile and can be individually integrated into almost any transporter. Learn more Air filtration systems These highly efficient retrofit air particulate filters in accordance with HEPA guidelines for ...

Alpine Power Systems" Atlanta, GA facility provides critical power, telecom, and motive power solutions to Georgia, Alabama, and South Carolina. Our certified technicians can provide cradle-to-grave services on batteries, chargers, dc ...

Suitable for recreational and commercial vessels, the technology delivers optimal battery performance in a modular and scalable package. For vessels with extensive DC onboard power networks that require a robust management system, the CV Standard Battery System offers 35-350 kW/h of storage and is configurable for 400V and 800V applications.

Webasto excels in crafting personalized battery systems, showcasing remarkable flexibility to meet diverse customer needs. Specializing in tailored solutions for both passenger and commercial vehicles, we adeptly deliver customized or build-to-print battery solutions with precision and success.

The Webasto CV Standard Battery System guarantees top-notch quality and safety. Its modular, scalable design caters to diverse vehicle types, offering robust housing, unwavering quality, and efficient thermal management.

Bij Webasto zijn we ervan overtuigd dat elektromobiliteit de toekomst heeft. Daarom gebruiken we onze expertise op het gebied van autotechnologie om de ontwikkeling van batterijen voor een breed scala aan voertuigtoepassingen te stimuleren. Met OEM-specifieke accu-oplossingen en een modulair, gestandaardiseerd accusysteem kan Webasto voldoen ...

Lohr relies on battery systems from Webasto. Starting in October 2021. The French transport company Lohr

will launch Cristal, the all-electric modular shuttle system, in four cities in France. The vehicles will be powered by batteries from Webasto, one of the 100 largest suppliers to the automotive industry worldwide. ... One of the most modern ...

The Webasto CV standard battery system is designed for total scalability and configuration flexibility. Each battery pack has 35kWh of energy and up to 10 packs can be used for a combined 350kWh. With 400V and ...

Suitable for recreational and commercial vessels, the technology delivers optimal battery performance in a modular and scalable package. For vessels with extensive DC onboard power networks that require ...

All Webasto power cycling systems are equipped with a real-time clock on the system's control board that enables measurement of Ah and kWh during cycling. The ABC-150 offers power up to 125 kW, with a voltage range of 8 to 445 VDC and a current range of 177;530 ADC.

Get a complete overview of Webasto's battery portfolio. Whether standard battery packs or thermal solutions. We offer the full package for the electrification of vehicles of all kinds. ... Rooftop air-conditioning systems; Parking coolers; Integrated air-conditioning systems; Transport refrigeration; Air filtration systems; Marine air ...

Gilching - August 4, 2022 - Now that it has obtained the CE mark, Webasto, system partner for electromobility and one of the leading suppliers in the automotive sector, declares the conformity of its standard battery system and the Vehicle Interface Box (VIB) with the European Low Voltage Directive (2014/35/EU) and the EMC Directive (2014/30/EU), as well as compliance with the ...

Stockdorf - 23. März 2022 - Ob Flughafenfahrzeug, Lkw oder Baumaschinen - für Unternehmen, die ihre mit traditionellen Verbrennungsmotoren bestückten Nutzfahrzeuge auf elektrischen Betrieb umstellen möchten, bietet Webasto ...

High-performance heating and battery systems for efficient and dynamic electromobility. As one of the top 100 automotive suppliers worldwide, Webasto actively supports the transformation of the industry with expertise and future-oriented solutions. With more than 50 locations worldwide, Webasto is close to customers around the globe.

Stockdorf - 29. November 2021 - Drei Tage ganz im Zeichen der batteriebetriebenen Mobilität - und Webasto ist mittendrin.. Der Top 100 Automobilzulieferer aus Stockdorf bei München ist vom 30. November bis zum 2. Dezember 2021 mit einem eigenen Stand (6-560) auf der Battery Show Europe in Stuttgart vertreten.

Webasto is underscoring the future importance of its Schierling site with the commissioning of the photovoltaic system. One of the most modern battery system production facilities has already been located here since 2019 ...

Webasto is underscoring the future importance of its Schierling site with the commissioning of the photovoltaic system. One of the most modern battery system production facilities has already been located here since 2019 - the highly flexible Multi-Product-Line, which can produce up to 40,000 battery systems per annum.

Die Webasto Standard Battery Pro 40 legt Wert auf Sicherheit und Qualität und zeichnet sich durch ein modulares und skalierbares Design aus, das für verschiedene Fahrzeugtypen geeignet ist, von leichten Nutzfahrzeugen bis hin ...

CV Standard Battery System. ... Le système de batteries Webasto CV Standard répond aux normes de qualité et de sécurité les plus strictes. Grâce à sa conception modulaire et évolutive, elle sert de batterie de traction polyvalente pour un large éventail de véhicules, allant des véhicules utilitaires légers aux diverses machines ...

Since thermal management keeps battery systems in optimum operating temperature for positive effects on performance and range, Webasto offers both custom developments and off-the-shelf solutions for the CV ...

Gilching, May 14, 2024 - As part of a product update, Webasto is increasing the energy content of its traction batteries from 35 to 40 kilowatt hours (kWh). The standardized product design of the new Standard Battery Pro 40 gives existing and new customers planning security for the coming years and facilitates multi-year electrification projects.
