

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

Is Western Sahara a 'question of decolonisation'?

Western Sahara is the only African territory remaining on the list. It's also the only territory where the administering power column is left blank - a footnote explains the UN considers it a "question of decolonisation which remained to be completed by the people of Western Sahara".

Which African territories are still on the 'Administering Power' List?

As territories gained independence, they have gradually been ticked off the list, and those that remain are almost all small Pacific or Caribbean island nations. In each case, an "administering power" (usually the UK) is officially noted. Western Sahara is the only African territory remaining on the list.
