

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

How will Axpo's solar projects impact France?

The projects are expected to contribute significantly to local renewable energy supply and align with France's ambitious energy targets. Axpo's solar division, through its subsidiary Urbasolar, secured the second-highest awarded capacity in France at 124 megawatts peak (MWp).

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is Axpo's second-highest solar capacity in France?

Axpo's solar division, through its subsidiary Urbasolar, secured the second-highest awarded capacity in France at 124 megawatts peak (MWp). This capacity is distributed across 20 projects, including ground-mounted, agriculture photovoltaic (PV) and floating PV installations in nine French regions.

Why is XPO a sustainable transport company?

Road freight transport contributes approximately 10% of the global total of CO2 emissions. Recognizing this, XPO is acutely aware of the importance of transitioning to sustainable practices. XPO provides a range of low carbon transport solutions, catering to the diverse needs of our customers and combatting emissions from all angles. These include:

Who is Axpo & Borealis?

In 2023, the Swiss renewable energy producer signed an eight-year power purchase agreement with Austrian polyolefins recycler Borealis. "Axpo secures 163MW in French renewable energy tenders" was originally created and published by Power Technology, a GlobalData owned brand.

energy source in French Polynesia with an installed capacity of 49.3 MW. The photovoltaic sector is expanding from 4.7 GWh in 2010 to 40 GWh in 2019. It now accounts for 5.8% of the electricity mix in French Polynesia. Installed capacity is 41.1 MWp in 2019. 28.8%
