

Yotta energy Cuba

Who is yotta energy?

Yotta Energy is a venture backed energy technology company headquartered in Austin, Texas. We have a complete range of distributed energy technologies to convert buildings into their own solar power plants. We are a team of clean technology experts on a mission to build the tools for a future where humanity can achieve true energy independence.

What happened to Cuba's energy system in October?

For nearly a week in October, most of Cuba suffered near-total blackouts, the worst energy outages in decades. Cuba's energy and mines ministry said "conditions are more favorable now than in the last disconnection" and that the system was gradually being restored.

Are US sanctions hurting Cuba's energy sector?

Cuban officials say US economic sanctions, which increased under the previous Trump administration, have further crippled the already ailing energy sector, although critics also fault a lack of government investment in infrastructure. For nearly a week in October, most of Cuba suffered near-total blackouts, the worst energy outages in decades.
