

To recognize these, some states have created zero-emissions credits or ZECs, which are similar to renewable energy credits (RECs). A ZEC is a tradeable financial instrument that allows the owner of a zero-emissions electric generating plant to receive revenue associated with the zero-emissions attribute of its electric production.

Ministry of Energy-Power Division, Government of Pakistan, Islamabad, Pakistan. 3,352 likes · 128 talking about this · 1 was here. This is Official Facebook page of Ministry of Energy-Power Division,...

Pakistan is importing nearly a third of its energy demand. In the year 2017-2018, its energy imports were around US\$ 14.4 billion as compared to US\$ 10.9 billion in the previous year (SBP, 2018).Almost 75% of the US\$ 3.5 billion increase in energy imports was due to higher energy prices, and only about 25% increase was due to increase in energy import volumes.

If Pakistan's private sector plays its cards right, there can be creation of cutting-edge green products and green jobs, there can energy security from renewable energy transition, and there can be enhanced product reach from early compliance with global standards like net zero. We are undergoing a major shift in the way we conduct business.

PECI, an initiative of Renewables First, is an innovative platform that consolidates fragmented energy data from various agencies, supporting informed decision-making across Pakistan's energy sector. By centralizing
