

What is a zenergiZe energy storage system?

The new ZenergiZe range from Atlas Copco takes modular energy storage to a new level. Developed with sustainability in mind, it helps operators to dramatically reduce their fuel consumption and CO2 emissions, while delivering optimal performance with zero noise and virtually no maintenance. What is a battery energy storage system?

Does zenergiZe use a lot of fuel?

When the ZenergiZe operates in island mode and it's powered by renewable sources, there is no fuel consumption. The new ZenergiZe range from Atlas Copco takes modular energy storage to a new level.

What can zenergiZe be used for?

It can be used as a standalone source, combined with generators to make a hybrid power solution or renewable sources of energy as well as to create Microgrids. The new ZenergiZe is the ideal solution for demanding applications that require a constant and significant flow of electrical energy.

What is a zenergiZe unit?

The ZenergiZe units are an ideal way to meet operating and safety restrictions in noise-sensitive environments such as events and metropolitan construction sites, to power remote telecom applications, or to resolve low load problems.

What is a zenergiZe generator?

With a footprint of just 1.4 m², the ZenergiZe range is ideal for applications where floor space is limited. The use of high-density lithium-ion batteries means that they are 70% smaller and lighter in weight than traditional standalone generators, allowing transport without any specialist equipment.

How big is a zenergiZe battery?

With a footprint of just 10ft or 20ft, depending on the model, the ZenergiZe range is ideal for applications where floor space is limited. The use of high-density lithium-ion batteries means that they are 70 percent smaller and lighter in weight than other battery technologies.

The ZenergiZe range features two models, ZBE and ZBP. They offer rated powers of 15kVA and 45kVA, and energy storage capacities of 45kWh, capable of delivering small-medium power with long autonomy. The versatile energy storage systems can be used together with a generator to enable smart load management.

The ZenergiZe Energy Storage Systems enable versatile smart load management, which helps an attached generator reach peak power, optimise its performance, and extends its lifespan by up to 15 per cent. This can also decrease general maintenance and overhaul by 50 per cent, and also allow for a 40 per cent smaller

generator to be used.

The latest energy storage system from Atlas Copco, the ZenergiZe ZBC range offers rated power from 100kVA to 1000kVA and an energy storage capacity of up to 2000kWh to deliver high ...

The latest energy storage system from Atlas Copco, the ZenergiZe ZBC range offers rated power from 100kVA to 1000kVA and an energy storage capacity of 250kWh and 2000kWh depending on the model, to deliver high power with long autonomy. The versatile energy storage system can be used together with a generator to enable smart load management.

Experience the next level of sustainability with Atlas Copco's Zenergize battery energy storage systems. Since their introduction in 2022, these systems have been delivering clean power without compromising efficiency or the environment. According to the 2023 Clean Energy Australia report, battery storage is set to play a significant role in the ongoing global ...

The ZenergiZe range of battery energy storage systems from Atlas Copco offers a clean, efficient and cost-effective solution to these challenges by offering a simpler way to capture and store renewable energy for immediate or later use, ...

Atlas Copco has launched ZenergiZe, a new range of lithium-ion energy storage systems that can be used as a standalone solution or combined with generators to create a hybrid power solution. ZenergiZe delivers zero CO2 emissions, zero noise, and have virtually zero maintenance needs, enabling operators to minimize environmental impact while ...

The ZenergiZe Energy Storage Systems enables versatile smart load management. The units help the generator reach the peaks of power, optimizing its performance, extending its lifespan up to 15%, and decreasing general maintenance and overhaul in overhaul by 50%.

When powered or charged by renewable sources, the ZenergiZe range of battery energy storage systems from Atlas Copco consumes zero fuel operating in island mode and produces zero CO₂ emissions when ...

The ZenergiZe range is also ideal for managing low load requirements. UP TO 40 % DOWNSIZE HYBRID SYSTEM The two models in the ZenergiZe range offer rated power of 15kVA and 45kVA, and energy storage capacity of 45kWh. The units are easy to connect to the generator thanks to a wide range of socket options. PLUG & POWER ZenergiZe, potential ...

Atlas Copco has launched ZenergiZe, a new range of lithium-ion energy storage systems that can be used as a standalone solution or combined with generators to create a hybrid power solution. ZenergiZe delivers zero CO2 emissions, zero noise, and have virtually zero maintenance needs, enabling operators to minimize environmental impact while benefiting ...

The new ZenergiZe range from Atlas Copco takes modular energy storage to a new level. Developed with sustainability in mind, it helps operators dramatically reduce their fuel consumption and CO2 emissions, while delivering optimal ...

Atlas Copco has launched ZenergiZe, a new range of lithium-ion energy storage systems that can be used as a standalone solution or combined with generators to create a hybrid power solution. ZenergiZe delivers zero CO ...

Atlas Copco has launched ZenergiZe, a new range of lithium-ion energy storage systems that can be used as a standalone solution or combined with generators to create a hybrid power solution. ZenergiZe delivers zero ...

Rand Air, a member of the Atlas Copco Group, recently added the new ZenergiZe ZBC 250 to 500 kVA battery energy storage system to its hire fleet. The company says that although the energy storage unit cannot replace ...

The ZenergiZe range enables operators to reduce emissions and fuel consumption in every application. For instance, if, among the operating modes of energy storage systems, it works in hybrid mode, the ZenergiZe reduces the emissions of a standalone generator up to 50 percent. This translates to approximately 100 tons of CO2 (the equivalent of planting 450 trees).

It can store the energy from diverse sources and manage the energy consumption and regulate the load for each of the applications associated with the microgrid using its intelligent control system. The ZenergiZe energy ...

The island mode enables the ZenergiZe energy storage system to be used as a standalone power solution with zero emissions and zero noise. The controller will automatically turn on and off the machine with the load demand. In hybrid modular mode with a generator, the Smart load manager controller, will start on and off the machines, providing a ...

The ZenergiZe solutions, which are the ultimate energy storage system technology, have a working life of over 40,000 hours. This translates to more than 5000 cycles, or over 1,600 days of continuous operation, although this figure is useful for illustration purposes only, as battery energy storage systems are primarily used as a temporary system.

Atlas Copco Power Technique has introduced ZBC, the latest model in its lithium-ion energy storage system range, called ZenergiZe. It can be used as a standalone source, combined with generators to make a hybrid ...
